Church Growth Resources

Church Growth Resources The Church Growth and Revitalization Committee, under the direction of the Strategic Growth Initiative, has two new resources to assist you in strengthening and growing your local church.

The [Church Health Checkup](#) is an evaluation which uses survey questions to obtain a clearer picture of your church's overall health. After completing the Church Health Checkup, you will receive an electronic report showing your church's score for various growth categories. The report will highlight your congregation's current strengths and help you identify areas which may need improvement.

The second resource is the [Church Growth Track](#), which is designed to help you strengthen the areas of weakness identified by the Church Health Checkup. The Church Growth Track features video sessions addressing some of the most important topics related to church growth and health. The lessons are taught by Apostolic pastors and leaders with a proven track record of helping churches attain healthy growth.

Visit MinistryCentral.com to access both resources and click on "SGI" at the top of the home page. Our prayer is that, after utilizing these tools, your local church will experience the health and growth God intended.

Sincerely in Christ,

David K. Bernard
